

D@n gerous Waters

I see you are back again for another adventure into the mindless realm of CodeBoy. Put the Hunter 5 in the CD drive and I should be able to make it through this without straying too far. By the way, are any of you seeing those giant bets? My lawyer has advised me to write this intro at break-neck speed, throwing caution – and a few Portuguese Cartel members – to the wind. I am once again completely oblivious to what month, day or state we happen to be in, but I'll let nothing stop me from writing this senseless drivel. There go those bets again!

Anyway, Christmas is on the way, and that should mean something to someone. DexDrive, PC GameShark and the TremorSlacks should all be filling the shelves at your neighborhood swap meets. Forget transfers; let's just keep going with it. I've been having a blast playing Metal Gear Solid, which should be in all of your hands by now. It's absolutely imperative that this game be played, non-stop, for the next 48 hours. Trust me; just do what I say. You'll understand, and coincidentally it's the only way to make the bets stop.

I'd like to take this time to invite any of you to participate in the great "Lunch with CodeBoy" contest. All you need to do is make it to Hunt Valley, Maryland and have a few bucks and we'll head off to the meat and pit-beef joint. This is for real. If you show up, I'll allow you the pleasure of dining with a slightly sweaty CodeBoy. Just don't bring any bats.

InterAct will bring gaming to a whole new level with the release of several products – just in time for the Holidays! Make sure you ask Santa to leave a few of these hot new peripherals under your tree this year, or else...

DexDrive

DexDrive is Here To Save You All!

The DexDrive site is up and running, check it out at www.dexchange.net to see what you're missing. The PlayStation version is out now and the Nintendo 64 version is coming soon! If you have your DexDrive, go there and download every save on the site, port a few saves, enter the contests, check out the save of the week and send Timmy an e-mail. Check out page 7 in this issue for more info on this exciting new peripheral.

DANGEROUS WATERS '99

We're starting '99 with a bang! After this issue, Dangerous Waters will be revamped with more info and codes and will also smell like cinnamon. Don't worry, we'll still have that idiot, CodeBoy blabbing about whatever he can type that day. We'll be adding a bunch of stuff that you, in a game, will definitely want to know about. So, if your subscription is running out, re-subscribe now!

There's Gold In Them, There Controllers!

We assure that anyone who has Zelda: Dcarina of Time must have pre-purchased it for the special gold cart. Well, it's time to accessorize with limited edition, matching gold SuperPad 64s and memory cards. The SuperPads are fully licensed by Nintendo, so while you're looking good, you can feel confident in your pad's performance.

Save The Day, With Character Memory Cards!

OK, we know, another stupid headline, but what can you do? Lara Croft, the first of many Character Memory Cards, is out now. Each card has 15-blocks of memory and a butt load of personality. Look for Goldberg and something Solid in the near future! Sports memory cards are on their way, too. Select cards will be available for PlayStation and Nintendo 64.

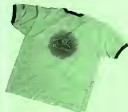

Fuse, It Has Moving Pictures!

That's right, it's a videogame magazine on a VHS cassette. This means that you can see the games in action, rather than looking at still screenshots. Fuse is in videogame stores everywhere, so go get one! Fuse is produced by Thin Ice Media and distributed by InterAct. You will be getting completely unbiased information on everything that's going down in the gaming community, on a video with moving pictures. Plus, the images move. Did we mention that yet?

In the days before the final transformation, John had become more and more skeptical. Minute details that had initially been overlooked had just surfaced, and were slowly adding up. At first it seemed to be the only answer, a true "way out." But upon further examination there were certain factors that just didn't fit—all were discovered conveniently after the agreement had been made, the contract signed and the appointment confirmed. There was no way out though, and John knew it. Within mere days he would be receiving a GameShark T-shirt. Send a \$12.00 check or money order to: InterAct Accessories, Inc., ATTN: RAY RAY, 10999 McCormick Road, Hunt Valley, MD 21031. No need for postage, we disposed of all the bodies.

A jittLE hÉlp frÖM mÝ FRiENDs

Hey, Kato here. CodeBoy asked if I would fill up some space on this issue due to his sudden lack of creativity. No, I do not know what caused it but he looks terrible. Anyway enough about him. I don't know about you readers, but I have been looking forward to some new releases for some time. With hot titles like Metal Gear Solid by Konami, Tenchu by Activision, and Tomb Raider III from our friends at Eidos, this promises to be one of the best release seasons yet! And let us not forget this spring when Rare (the creators of Goldeneye) should release Perfect Dark, a new shooter using the Goldeneye engine. Thirdly, SEGA's new system, the Dreamcast, hit the market in Japan in late November/early December and hopefully it will arrive in the US by next fall. What a great time to be working for a videogame company! Well, that is all I have been thinking about lately. I think CodeBoy's brain just exploded inside his head; he shouldn't be bleeding from the ears like that, should he? Anyway, you all enjoy the Holidays.
